

**TRACK & TRACE, FLEET MANAGEMENT & ANTI-THEFT SYSTEM**

## PROTECT YOUR **MACHINE** AGAINST THEFT

A machine often represents a significant investment and turns out to be an easy target for theft. That is why securing your machine should be your top priority.

### RELIABLE & EFFICIENT

GeoTracer takes machine security to the next level: we offer you a unique solution that provides extra protection in the event of sabotage (jamming) or unplanned moves. Our compact, waterproof system is discreetly installed on your machine. In addition to theft prevention, this system can also be used to monitor the operating hours.

### YOUR BENEFITS

✓ **Anti-theft + tracking**

When the signal is interrupted, an alarm notification via SMS and/or email or an emergency signal is transmitted. Moreover, you can view the current location of your property at any time via our app. In case of deviations, a start interruptor can be initiated.

✓ **Monitoring operating hours**

In addition to theft prevention, the system can be used to record information: it automatically keeps track of the number of operating hours to enable timely maintenance scheduling.

✓ **Handy overview when hiring**

Also when you rent out your machines, our solution provides you with a better overview and control. Handy for efficiently managing your machine fleet and sending out correct invoices!
