

GEOTRACER

TO PROTECT & TO MANAGE

TRACK & TRACE, FLEET MANAGEMENT & ANTI-THEFT SYSTEM

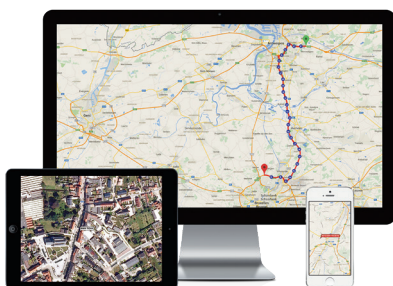

MANAGE YOUR YOUR EQUIPMENT WITH **RFID**

RFID stands for "Radio Frequency IDentification": we use wireless communication to locate your equipment.

CLEAR AND EFFICIENT

Losing the overview of your equipment/tools is sometimes unavoidable. GeoTracer's software based on the RFID technology keeps you informed of the current location of your equipment at all times.

GeoTracer offers a broad range of RFID tags in various forms and formats.

YOUR BENEFITS

**LESS THAN
1 EURO*
PER DAY**

- ✓ **Keep the overview**
The RFID technology enables us to offer you a clear picture of where any kind of equipment or tool is located. An RFID receiver in your vehicle or on your site captures the RFID signal, and enables you to locate your equipment on a map.
- ✓ **Save time and money**
Save time when searching for equipment: our software allows you to see at a glance where everything is located, as well as the history and the associated vehicle.
- ✓ **Protected against theft**
For any tools that have mysteriously gone missing, you can check where they were last detected.

*per vehicle, including hardware, installation and subscription fee (price calculated based on 60-month contract)
