

GEOTRACER
TO PROTECT & TO MANAGE

TRACK & TRACE, FLEET MANAGEMENT & ANTI-THEFT SYSTEM

IDENTIFY YOUR TRAILER WITH **RFID**

RFID stands for "Radio Frequency Identification": we use wireless communication to locate your trailer.

CLEAR AND EFFICIENT

It is virtually impossible to know at all times which trailer is attached to which tractor and vice versa. Our wireless RFID solution provides an answer to these questions: our application provides clear reports on the use of your fleet (+ history) and the tractor/trailer combinations.

YOUR BENEFITS

**LESS THAN
1 EURO*
PER DAY**

✓ **Keep the overview**

RFID enables us to identify the tractor to which your trailer is attached. This makes it very easy to identify the license plate of a particular tractor/trailer combination in case of traffic violations.

✓ **Track & Trace**

You can also effortlessly monitor your containers or silos with this technology: the location where they were last seen is recorded via the truck.

✓ **Protected against theft**

You receive a notification when your trailer is moved by a truck that cannot be identified.

✓ **Monitoring other parameters**

For refrigerated freight, RFID allows you to wirelessly monitor temperature, humidity, or opening of the doors. You are notified when deviations from the set parameters occur.

*per vehicle, including hardware, installation and subscription fee (price calculated based on 60-month contract)
