

GEOTRACER

TO PROTECT & TO MANAGE

TRACK & TRACE, FLEET MANAGEMENT & ANTI-THEFT SYSTEM

PROTECT AND MANAGE YOUR FLEET WITH TRACKING

The GeoTracer Track & Trace system is the optimal solution for managing and securing your fleet! In addition, we offer various options with clear reporting for a simplified administration.

CLEAR AND EFFICIENT

Do you also waste too much time getting an overview of your fleet, and are you making unnecessary costs in the meantime? Increase your efficiency thanks to the GeoTracer Track & Trace system: you will always know where each one of your vehicles is! In our user-friendly application you can consult a global overview in real time, as well as the route history. Moreover, you can make a separation between the use of the vehicle for work and the use for private life, and it is possible to verify the Kilometre Charge.

YOUR BENEFITS

- ✓ **Convenient overview of your fleet on a map**
In our user-friendly application you get a global overview of the locations of all your vehicles on a map in real time. In addition, you can always consult the history of the routes travelled per vehicle.
- ✓ **Clear reports**
Through our application you get access to clear reports in Excel or pdf about the use of the vehicle: a clear history of the distance travelled, the speed driven, stops, weekend use... With these data you can easily verify the Kilometre Charge and/or demonstrate that the vehicle is only used for professional purposes (see BIK tax).
- ✓ **Alarm notification in case of theft**
Your fleet is also secured against theft, thanks to our solution. You can set the parameters for the alarms yourself. In case of an alarm situation you will be informed by SMS and/or e-mail (several types of alarms are configurable).
- ✓ **Additional options possible**
In addition to Track & Trace, you can choose additional registrations that simplify your administration. Some examples: mobility calculation, time registration, temperature registration, remote transmission of tachograph data, analysis of driving style (eco driving), and so on.

**LESS THAN
0,50 EURO*
PER DAY**

*per vehicle, including hardware, installation and subscription fee (price calculated based on 60-month contract)
