

GEOTRACER
TO PROTECT & TO MANAGE

TRACK & TRACE, FLEET MANAGEMENT & ANTI-THEFT SYSTEM

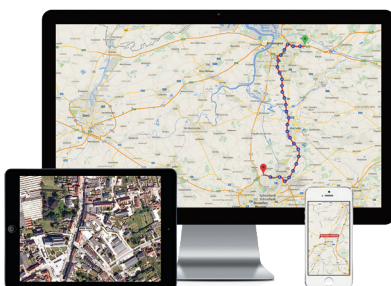

MANAGE AND PROTECT MOBILE OBJECTS AGAINST THEFT

For GeoTracer it is a priority to secure and map all of your assets: in addition to anti-theft systems for your truck, machine, car, oldtimer, moto... we also have the means to protect or follow up other objects.

EASY TO INSTALL

Some objects are an easy target for theft or must be followed up on a daily basis in terms of planning: objects without their own power supply, such as containers, silos, trailers, boats, caravans... but also less obvious theft-sensitive material such as insulation, wood, copper...

YOUR BENEFITS

BUDGET-FRIENDLY

- ✓ **Overview of your material***
Via the GeoTracer mobile app, you can consult the position of your material on your smartphone.
- ✓ **Alarm notification in case of theft***
In the application you can also manage the alarms: for example, you can be notified if unwanted movements occur (depending on the configuration and location*).
- ✓ **Autonomous, waterproof and easy to install yourself**
The waterproof unit is easy to install yourself (plug & play). Please make sure to install the unit in a well-hidden place.
The compact unit operates on internal batteries with a long lifespan. When it is time to replace the batteries, you will receive a notification.

*Please note that reception is limited in some countries.
